Thank you and welcome to the alpha!

Downloading the Alpha

You were sent an email containing a link to a web location from whence you obtained this file. If you check back you will see that as well as this PDF there are two other files – Prison Architect (PC) and Prison Architect (Macosx).

To play the game on Windows just download the PC zip file. You need to fully unzip this file into a new location before trying to run the game or you will get an error relating to SDL**. Right click on the zip and Extract the four files into a folder.** Then go into that folder and double click Prison Architect.exe to run the game.

To play the game on Mac OS just download the Macosx file. Double click to unzip it and double click the Prison Architect app to run the game.

Registration

You do not need to register with us, however if you do so you will be able to access the development wiki and forum.

1. If you don't have one you need an Introversion forum account from here: http://forums.introversion.co.uk/introversion/profile.php?mode=register

2. Armed with that head here: http://www.prison-architect.com/register

3. You'll then be able to access the wiki (to download the game): http://www.prison-architect.com/wiki

4. and access the discussion forum: http://forums.introversion.co.uk/prisonarchitect/viewforum.php?f=2

Any problems just visit support.introversion.co.uk in a web browser and we'll fix you up.

We hope you like the game!

Chris & Mark
